

## Installation tool for drop-in anchors

### Application range

- > For making the drill hole
- > For fast and reliable installation of drop-in anchors LA+ and LAL+

### Properties

- > Weight-optimised design
- > Optimised 4-cutting edge geometry

### Notice

The use of specially developed setting tools is highly recommended for installing drop-in anchors. Drop-in anchors cannot be tightened by a screw or bolt! If makeshift tools instead of professional setting tools are used to install anchors, the thread can be damaged and this causes problems during installation.
