

Corrosion protection spray

Application range

- > To protect zinc-plated facade anchor screws from moisture and driving rain

Properties

- > Permanently elastic protection from moisture and driving rain
- > Can be sprayed upside-down and reaches otherwise inaccessible corners and edges that are especially susceptible to corrosion
- > Fast-drying and non-dripping when applied evenly

Instructions for using galvanised zinc-plated facade anchor screws (excerpt from ETA-10/0305)

The special screw made of galvanised zinc-plated steel may also be used outside, after careful installation and if the area of the screw head is protected against moisture and driving rain in such a way that no moisture can enter the anchor shaft. This requires facade cladding or a rain screen fixed in front of the screw head and the screw head has to be coated with a soft-plastic, permanently elastic, bitumen oil combination coat (e.g. car underbody coating or cavity protection).
